

Explore The Possibilities

Science Educator Danny Tappa

As a hydrologist I study:

- Land-atmosphere water cycle dynamics
- Idaho moisture sources and climate change
- Locations of local aquifer recharge
- Soil moisture variability in dry climates
- Stable isotope precipitation hydrology

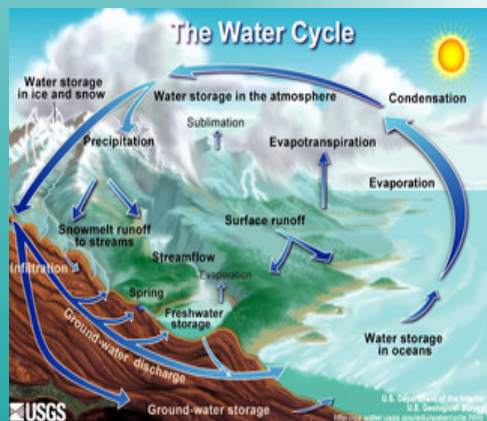

Bringing science to the classroom!

• As a National Science Foundation GK-12 Fellow, I have the opportunity to teach science lessons to your students!

• My research presents the opportunity for the K-12 community to get involved with real, hands-on science (ask me for more details!).

• Schedule a lesson at the Boise WaterShed or in your classroom!

• The best part.....It's FREE!!!
